WORK EXPERIENCE

Web Developer

Vivre [↗](#)

10/2017 – Present

Bucharest, Romania

Achievements/Tasks

- deepened my know-how about PHP, MySQL
- added Yii 1 and Yii 2 to the list of frameworks I've worked with. Developed 2 microservices in Yii 2, that use Google REST API
- learnt to work in a more hierarchical structure and AGILE way
- further developed my knowledge about Git, Vagrant, MySQL

Back-End Developer

Infinet Solutions [↗](#)

11/2016 – 10/2017

Achievements/Tasks

- developed web based applications such as CRMs, CMSs for different purposes
- maintained and/or optimized already developed applications and/or databases
- assisted clients in using the developed applications either by elaborating manuals or by direct assistance
- succeeded to deliver most of the projects before the assumed deadline for each one of them and always in less time than estimated and granted
- creating or suggesting new plans or ideas in order to improve some areas of the client business.
- learnt to work with SCRUM and AGILE methodologies

Contact: Beatrice Stroilescu (former Project Manager) – 0736661726

Co-Founder & CEO

geTTable [↗](#)

04/2014 – Present

Start-up project, founded by me and 3 other friends

Achievements/Tasks

- fund management
- marketing plan development
- overseeing the development of both smartphone applications (iOS, Android) as well as the web platform (debugging, testing, implementing changes to the operational logic of the system)

TECHNICAL SKILLS

Courses

- computer science
- physics
- Philosophy
- mathematics
- economics

Highschool INTERNATIONAL COMPUTER HIGH SCHOOL OF BUCHAREST

09/2008 – 02/2009

Courses

- computer science
- mathematics

PERSONAL PROJECTS

MP3Deposit.com (03/2015 – 07/2015)

- developed so that I could learn about web scraping techniques and best practices
- the purpose of the website was to provide users a powerful search engine for MP3 files, while have an user-friendly interface
- the challenge was to avoid legal issues, create a lightweight scraper which would run on a low-cost VPS and to optimize the website in order to gain good search engine rankings. I managed to do this by text scraping information already existent on other major audio search engines and parsing it. In the end, the database had ~ 2 million records and rapidly gained traffic to up to 30 000 visitors/day

CERTIFICATES

Certificate of professional competence in Computer Science (05/2012 – Present)

Certificate in Advanced English (06/2011 – Present)

CCNA Exploration - Network fundamentals (01/2010 – Present)
