WORK EXPERIENCE

Full Stack Web Developer Staffcloud

05/2022 - 03/2023

HR Software for professional staff planners

Achievements/Tasks

- further developed usage of best guidelines for Laravel, ReactJS
- further developed my team collaboration skills
- developed presentation skills during team and company presentations

Contact : Cristian Fleischer - cristian.fleischer@staff.cloud

Web Developer

Vivre [↗](#)

10/2017 - Present

Bucharest, Romania

Achievements/Tasks

- deepened my know-how about PHP, MySQL;
- added Yii 1 and Yii 2 to the list of frameworks I've worked with. Developed 2 microservices in Yii 2, that use Google REST API;
- learnt to work in a more hierarchical structure and AGILE way;
- further developed my knowledge about Git, Vagrant, MySQL;
- started working with VueJS;

Full Stack Developer B Programmer

10/2021 - 04/2022

Bucharest, Romania

Achievements/Tasks

- implemented various tasks on both back-end and front-end;
- learnt more about Docker setups, working with a complex development stack setup;
- learnt and applied more Symfony and DDD "best practices";
- learnt to organise my time better and work more efficiently, working at multiple projects at the same time;

Contact : Titi Marius Sorin Anghel - +40765531250

Back-End Developer

Infinet Solutions [↗](#)

11/2016 - 10/2017

Achievements/Tasks

- developed web based applications such as CRMs, CMSs for different purposes
- maintained and/or optimized already developed applications and/or databases
- assisted clients in using the developed applications either by elaborating manuals or by direct assistance
- succeeded to deliver most of the projects before the assumed deadline for each one of them and always in less time than estimated and granted
- creating or suggesting new plans or ideas in order to improve some areas of the client business
- learnt to work with SCRUM and AGILE methodologies

Contact : Beatrice Stroilescu (former Project Manager) - +40736661726

Co-Founder & CEO

geTTable [↗](#)

04/2014 - 12/2020

Start-up project, founded by me and 3 other friends

Achievements/Tasks

- fund management;
- marketing plan development;
- overseeing the development of both smartphone applications (iOS, Android) as well as the web platform (debugging, testing, implementing changes to the operational logic of the system);

WORK EXPERIENCE

Web Development Freelance

01/2011 - Present

Achievements/Tasks

- developed the strategy for both short and long term;
- developed marketing strategies (social media, customer Acquisition, branding);
- created the website structure and optimized it in order to obtain the best possible positioning in search engines;
- scheduled deadlines and prevailed meeting them;
- developed solutions to satisfy and equally meet the customer's needs and expectations, without exceeding the budget set;

EDUCATION

University

TECHNICAL UNIVERSITY OF CIVIL ENGINEERING BUCHAREST

10/2012 - 07/2016

ORGANIZATIONS

Mensa Romania (12/2015 - Present)

Member

PERSONAL PROJECTS

Sysrequirements.com (10/2016 - Present)

- experimented with Symfony framework 3.*, 4.* and now 6.* - using console commands, web scraping techniques
- implemented the recommended Webpack Encore usage in order to minify the website assets' footprint
- learnt more about using Docker in creating a local development setup

Youtubeable.net (02/2017 - 07/2019) [↗](#)

- developed so that I could play with Youtube's API and some other PHP libraries
- the purpose of the website is to provide users access the their Youtube playlists and be able to export the list of videos from each playlist, download/convert any of the videos or buy the song, if applicable

Car rental system (05/2017 - 12/2018)

- the main point of the project is to provide a complete environment for a car rental company : website + CRM

MP3Deposit.com (03/2015 - 07/2015)

- developed so that I could learn about web scraping techniques and best practices
- the purpose of the website was to provide users a powerful search engine for MP3 files, while having an user-friendly interface
- the challenge was to create a lightweight scraper which would run on a low-cost VPS and to optimise the website in order to gain good search engine rankings. I managed to do this by text scraping information already existent on other major audio search engines and parsing it. In the end, the database had ~ 2 million records and rapidly gained traffic to up to 30 000 visitors/day

CERTIFICATES

Certificate of professional competence in Computer
Science (05/2012 - Present)

Certificate in Advanced English (06/2011 - Present)

CCNA Exploration - Network fundamentals
(01/2010 - Present)
